## NEW IDEAS

### "Braking Systems"

Interview with Pierre DUBRUC, CLB Commercial Manager

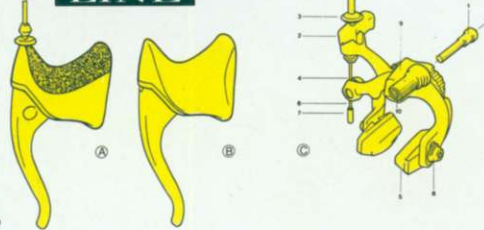

It's true, we attach great importance to the concept of "Braking System" and a determination to ensure that riders understand the idea: a "Braking Group"

Our new "TOPLINE" and "OMEGA" systems have been specially designed to ensure greater efficiency from all the components, so that calipers, levers and cables are working together to give you "Stopping Power". And all this is achieved without sacrificing good looks! CLB engineers also ensure that our brakes blend sympathetically with the aesthetics of the bicycles that they are designed for.

#### What do CLB offer that other brake manufacturers don't?

There are many advantages with TOP LINE as Professional Riders will readily tell you.

### SYSTEME 'TOP' LINE

All are agreed on the efficiency and performance of our braking systems.

And you can get the spares! A full after-sales service is provided with components always in stock.

#### And your aims in the near future?

We are working ceaselessly to improve the security and safety of cyclists, so far example, we are offering a new brake pad, the EXTREM, specially designed for efficient braking in wet weather. We have also asked design specialists to look at the needs of different people. We're not all the same height and shape and weight after all, so we need products to meet the requirements across a wide spectrum...

## NEW PRODUCTS

89-90  
The great years from the CLB stable

- **"ELITE" system**  
chosen by and ridden by professionals (Z-Peugeot, Jeannie Longo, etc...).
- **"OMEGA" system**  
Now available in an attractive attache case with inside pulling lever.
- **"EXTREM" all weather brake pads**  
The solution for safe-stopping in the wet. Available on Elite and Omega.
- **"ATB"**  
New developments on the way!
- **Brakes for children**  
CLB, the 1st manufacturer to offer, at last, efficient brakes designed specifically for children.
- **Non-compressible outer-cable**

## NEW RANGE

### The "OMEGA" is "Together"

In addition to its indisputably up-to-date aesthetics, the OMEGA has the technical characteristics which are so successful on CLB top range models i.e.:

- the hollow pin the simplified fitting and adjustment
- the SBS device (Synchronised Braking System) which produces superbly balanced braking.

Choice of colour for customising the bike : silver, white, black, charcoal grey...

**NEW:**

Available in 2 reaches :

OMEGA R : 43/57  
OMEGA T : 53/72

## NEW SHAPES

### Full marks for Looks ! But we mustn't forget performance and efficiency

Beware !

The new CLB levers are so good-looking that they will blind you to alternatives !

Fitting ? So, so easy !

No comments for looks, but what about technic ?

- internal pulling cables with lateral issue for concealed outer cables
- integrated spring in the lever
- ergonomically designed hand rests (right and left)
  - direct access to the fixing pin

and CLB

has still more news for you !

## NEW LANGUAGE

### Action rather than words !!

During our forthcoming issues, we will give you the maximum of technical information. No long (and dull) reams of words but positive and useful things... test results, diagrams, graphs...

And do not forget, this newspaper is yours. So don't hesitate to contact us with comments, observations and suggestions.
